

WEIQING FENG

Weiqing Feng has more than ten years experience designing and managing classical and traditional residential projects requiring high levels of detail and complexity. She also has three years teaching experience in architecture at Tsinghua University, China. Ms. Feng has practiced architecture based on vernacular, traditional and classical languages--integrating the classical idea into modern life with its particular functions and needs. She believes in the continuity of human cultures and the importance of history. Her designs have been published and exhibited in journals and venues in the United States, Europe, and Asia and she has been a visiting critic at the University of Notre Dame.

Experience with Allan Greenberg Architect, LLC:

Weiqing joined Allan Greenberg, Architect in 2007 as a Project Manager, working on high-end apartment renovations in New York City as well as the design of a recreation/exercise building and support buildings on a country estate in Bedford, New York.

Other Professional Experience:

During her more than ten years of professional experience in the United States, Ms. Feng managed the design and construction of two new high-end residential houses and their ancillary structures in Los Angeles as well as coordinated the design and extensive renovations to an existing traditional house in Beverly Hills. As Project Designer, she prepared designs for a Golf Club in Greenbrier, West Virginia and six Charleston-style model houses in Savannah.

Prior to joining Allan Greenberg, Architect, Ms. Feng was an Associate at Ferguson & Shamamian Architects in New York, New York. Previously, she worked with Booth Hansen Associates in Chicago and Thomas Norman Rajkovich Architect in Evanston. During her three years as a tenure-track faculty member at Tsinghua University, Beijing, Ms. Feng continued her professional practice, working on residential, commercial, and recreational building designs in addition to urban planning projects.
